

Remember Alamo when you make your spring AI breeding decisions. He continues to be unmatched in his ultrasound carcass and performance measurements. His outcross pedigree, eye appeal and structural correctness also make him an easy choice. Reg. # 4295093

Alamo's first calves have arrived this spring, and they look very promising with a moderate, 75 lb. average birth weight out of mature cows. They are getting off to a great start with explosive early growth, plenty of depth and eye appeal. Semen \$ 25.00 per straw.
